

The Moors at Arne Project

Notice of Passing Places Improvements

In preparation for the start of construction activities on The Moors at Arne site, some improvements are being made to the existing 8 passing places along New Road and Arne Road.

Works are being carried out by our approved sub-contractor commencing 5 June and will consist of vegetation clearance and some surface levelling works. Works are expected to take no longer than 2 weeks to complete.

We will be checking for active bird's nests along the route before commencing any works.

Temporary traffic management measures will be in place during the works with the use of 'stop/go' boards.

These changes are being implemented as part of our Construction Traffic Management Plan and have been authorised by Dorset Highways.

These measures are essential to help maintain safety for all road users and minimise congestion on local roads.

We apologise for any inconvenience caused during the next 2 weeks as these essential works take place.

For more information on our traffic plans please visit
